(54) METHOD AND DEVICE FOR PROCESSING MERCHANDISE SALES DATA AND
COMPUTER READABLE STORAGE MEDIUM STORING MERCHANDISE SALES DATA
PROCESSING PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a merchandise sales data processor or the like with which a purposed service can be objectively and exactly classified and the followup ability is improved.

SOLUTION: A host machine 20 is provided with a client point master file 23M, point rate table 23R, additional rate extraction control means 21 and 22, this time point recalculating means 21 and 22, totalizing means 21 and 22 for total acquired points in this term and after-recalculation this time point transmitting means 21 and 22 and the additional magnification of '3' corresponding to the total acquired point in the first term is extracted. At the same time, the point at this time reflecting the point at this time of '100' with the extracted additional rate is formed so as to be calculated again and the point at this time after recalculation, with which the point '300' at this time after calculation can be accumulated to the total acquired point in this term, received from the host machine 20 to each terminal 10 in place of the point at this time applied by the present machine is formed so as to be applied to a client.
